

NCHSTE Institute of Excellence for the Health Science Cluster

Outcomes

November 17-19, 2005 or February 9-11, 2006

Expected Outcomes:

- Participants will be knowledgeable of and understand the criticality of implementing the 15 components and the accompanying measures for building a systemic and sustainable health science program.
- Participants will understand the value of working within an interdisciplinary team.
- Participants will understand the timelines, activities, and portfolio development for NCHSTE IEHSC participation.

- Participants will be familiar with the wide range of careers available in health care, current and projected workforce demands and unique characteristics of health care as an industry sector.
- Participants will understand the benefits for both health care and education in forming partnerships designed to build an adequate and well prepared health care workforce.
- Participants will be knowledgeable of expectations and requirements for students in job shadow, exploration or internship experiences.

- Participants will be familiar with the National Health Science Foundation Standards and Accountability Criteria.
- Participants will demonstrate methods for blending selected academic and health science foundation standards.
- Participants will have a full understanding of the correlation between secondary learning and postsecondary program success.
- Participants will have an increased awareness of health care site based procedures, culture, and environment.
- Participants will align academic standards with health care procedures to develop integrated unit.
- Participants will evaluate their guided study tour and experience.
- Participants will use materials to evaluate resources.
- Participants will have a clear understanding of the value healthcare as the context for strengthening academic achievements.
- Participants will complete an integrated unit utilizing academic and health science foundation standards as the basis.
- Participants will form a network among participants for sharing and support.
